1742	INICI	INO.	

April 2019

Time - Three hours (Maximum Marks: 75)

- [N.B: (1) G.No. 8 in PART A and Q.No. 16 in PART B are compulsory. Answer any FOUR questions from the remaining in each PART - A and PART - B
 - (2) Answer division (a) or division (b) of each question in PART C.
 - (3) Each question carries 2 marks in PART A, 3 marks in Part B and 10 marks in PART - C. J

PART - A

- 1. What are the various fields in an instruction format?
- 2. What is the advantage of interrupt initiated data transfer?
- Define paging.
- 4. List down the Flynn's classification of computer.
- 5. What is pipelining?
- Expand NUMA.
- List any two characteristics of SMP.
- 8. What is the function of a decoder in a memory connection?

PART - B

- Give the RTL for memory read operations.
- 10. Draw the block diagram of I/O Interface.
- 11. Write a short note about MODEM.
- 12. How to initialize a cache memory?
- Explain four stage pipeline with block diagram.
- Differentiate NUMA from SMP.
- 15. What are the advantages of using dedicated caches over shared caches?
- Draw the flag register. Explain about the various setting of the flags.

[Turn over.....

185/76-1

PART - C

17. (a) Explain about register transfer in detail.

(Or)

- (b) Explain in detail the functioning of the control unit with block diagram.
- (a) (i) Explain destination initiated hand shaking method of data transfer.
 - (ii) Draw the flow chart of CPU-IOP communication.

(Or)

- (b) Explain interrupt controller operation.
- (a) (i) Explain the operation of a magnetic disk.
 (ii) How to map a virtual address using pages?
 - (b) Explain about direct mapping technique of cache memory.
- 20. (a) (i) Explain the different blocks in BIU of 8086.
 (ii) Write the various types of parallel computer organisations.
 - (b) Explain the instruction pipeline in detail.
- 21. (a) (i) Write about different approaches to vector computation.

(ii) Explain about SMP organization.

(Or)

(b) Draw and explain the core i7 processor operation.
