	3.Tech. DEGREE EXAMI Seventh S Civil Engi 704 – ESTIMATION AN (Regulation	Semester ineering D QUANTITY S	
Time: Three Hours			Maximum: 100 Mark
	AnswerALL	questions.	
	PART	' – A	(10×2=20 Mark
Summarize the method.	e advantages of centre line		
2. Give the units	of measurements for plaste	ering, flooring an	d painting.
3. List out the fac	ctors to'be considered in des	sign of septic tanl	c.
4. Describe the m	ethods to determine the ar	rea of roads in exc	eavation.
5. Define lump su	um contract.		
6. Define Arbitra	tors.		
7. List out the dif	ferent methods of deprecia	tion.	
	he meaning of salvage value	ue.	
9. List out metho			
10. Distinguish be	tween freehold lease hold p	property.	

Anna Univ Notes, Syllabus, Question Papers @ www.AllAbtEngg.com

i) Cost of land Rs. 10,000.00. ii) Cost of construction of building Rs. 40,000.00 iii) Costs of roads with in compounds and fencing Rs. 2,000.00 iv) Cost of electric installation including fans -10% of the cost of building. v) Municipal house tax Rs. 400.00 per annum. vi) Water Tax Rs. 250.00 per annum. vii) Property tax Rs. 140.00 per annum. (OR) b) A three storied building is standing on a plot of land measuring 800 sq m. The	i) Earthwork in excavation in foundation. ii) Lime concrete in roof terracing. (68 iii) Centering and shuttering. (68 (69 (68) (69) (69) (69) (69) (69) (69) (69) (60) (60) (70) (80) (81) (81) (82) (82) (83) (84) (84) (85) (86) (86) (86) (86) (87) (86) (87) (86) (87) (87) (88) (89) (80)	i) Earthwork in excavation in foundation. ii) Lime concrete in roof terracing. iii) Centering and shuttering. (OR) b) Briefly explain the following. i) Schedule of rates. ii) Lump sum contract and labour contract. iii) Termination of contract. 14. a) Calculate the standard rent of a government residential building newly constructed from the following data. i) Cost of land Rs. 10,000.00. ii) Cost of construction of building Rs. 40,000.00 iii) Costs of roads with in compounds and fencing Rs. 2,000.00 iv) Cost of electric installation including fans -10% of the cost of building. v) Municipal house tax Rs. 400.00 per annum. vi) Water Tax Rs. 250.00 per annum. (OR) b) A three storied building is standing on a plot of land measuring 800 sq.m. The Plinth area of each storey is 400 sq.m. The building is of RCC framed structure and the future life may be taken as 70 years. The building fetches a gross rent of Rs. 1500 per month. Work out the capitalized value of the property on the basis of 6% net yield. For sinking fund 3% compound interest may be assumed. Cost of land may be taken as Rs. 40.00 per sq.m. other data required may be assumed suitably.	i) Earthwork in excavation in foundation. ii) Lime concrete in roof terracing. (68) (OR) b) Briefly explain the following. i) Schedule of rates. ii) Lump sum contract and labour contract. (50) 14. a) Calculate the standard rent of a government residential building newly constructed from the following data. i) Cost of land Rs. 10,000.00. ii) Cost of construction of building Rs. 40,000.00 iii) Costs of roads with in compounds and fencing Rs. 2,000.00 iv) Cost of electric installation including fans -10% of the cost of building. v) Municipal house tax Rs. 400.00 per annum. vi) Water Tax Rs. 250.00 per annum.
